***NEW GHC Service—Subrogation Recovery  
for the Public Sector***

Did you know that your public entity may be entitled to recover money owed to you by a legally responsible, negligent third party? At GHC, we believe recovery of any money due your entity is important—especially in today's economy beset with financial challenges and budget cutbacks.

Use GHC's Subrogation Recovery Service to significantly and legally enhance the value of your risk management department. Under the leadership of Charles A Torretta SCLA, MCSA, we provide a timely, effective and well-managed program that focuses on accurate investigation and analysis of losses for subrogation and recovery, including review of your onsite files, and actual onsite investigations if needed.

***We'll help your entity recover money that  
may have been overlooked (or forgotten)  
in your claims handling processes and procedures.***

GHC's early claim involvement focuses on maximizing recoveries and simultaneously reducing expenses. Our investigations and evaluations are done using the highest professional standards utilizing true subrogation specialists. The subrogation recovery claims we handle range from small to large, from fire and police vehicle auto accidents, to those involving complex legal issues.

***GHC subrogation professionals are highly experienced,  
credentialed, and able to respond quickly whenever and  
wherever a problem arises.***

Give GHC an opportunity to review your onsite files and assess whether your entity is due unclaimed money from a third party. If money is due you—we'll help you get it through timely and effective negotiation and the use of counsel if necessary.
